

[41:26 - 41:37] Speaker B: Is not aa aa maybe to apply visa. It's not like nice have to identify these person and create the ID kan. But in advance maybe the APS data already send the. Okay. aa. Some of it. That's a. there's a publish and subscribe.

[41:37 - 41:41] Speaker B: Anybody subscribes to that visa capture real time updates right. So by the use power element.

[41:41 - 41:49] Speaker B: aa either aa on the aa I think. But I know because it's too easier. Yes. apply aa the to to aa what's they call aa. Two scenarios lah whether the person ticket first,

[41:49 - 41:53] Speaker A: Apply visa or apply visa ticket.

[41:53 - 41:56] Speaker B: Apply tiket is not it's very different from aa. Socket, it's not like socket, it's not two way.

[41:56 - 41:57] Speaker C: Yeah.

[41:57 - 42:04] Speaker B: I mean some using RRO, some sometimes those like we have a promotion right promotion right, they they put a open ticket for one year validity then fly visa. That one is aa is a requirement the dalam visa pass. There's a requirement to check aa.

[42:04 - 42:16] Speaker C: In the current situation. For visa there's a requirement aa currently they have to submit the ticket the booking. ticket has to aa ada evidence. But the problem is they cannot verify whether the booking is right or not. legitimate or not.

[42:16 - 42:22] Speaker C: But I heard there is some ideas is not mandatory later. whether can submit aa as a evidence or not.

[42:22 - 42:30] Speaker B: aa from from like only one way, one way aa flow the aa SITA will send the data to Nice right. So if aa the other way round, aa Nice need to send the DVD.

[42:30 - 42:33] Speaker B: Only this one. We can check in.

[42:33 - 42:44] Speaker B: We need some form of aa risk assessment results to come back for this aa AAP. So we can determine the body guarding. Whether bought or no bought. So need this aa.

[42:52 - 42:54] Speaker D: just deal. The two way right for the APP. what about not about. Send the first and second time.

[42:54 - 42:58] Speaker B: They will send the second time. Pas itu kita nak keluar dengan. They must send, they can't send.

[45:00 - 45:05] Speaker A: Kita tengok.

[45:05 - 45:07] Speaker A: Test dia.

[45:07 - 45:17] Speaker A: Betul-betul eh. For the APP apa hal dengan dia? Dia pun sama saja. Dia pun sama saja kan? Habis kita sama pula kan?

[45:17 - 45:19] Speaker A: Dia must be, dia bukan sama eh?

[45:20 - 45:24] Speaker A: Tak boleh buat macam ini pula.

[45:25 - 45:27] Speaker A: Macam mana?

[45:27 - 45:34] Speaker A: This spot off load board, dia terus tak dapat buat. Kita tahu.

[45:34 - 45:36] Speaker A: Macam mana?

[45:36 - 45:42] Speaker A: The, ah yang APP ini, this one is real time, boleh tak?

[45:43 - 45:44] Speaker B: Real time.

[45:44 - 45:47] Speaker A: Betul? You see this APP right?

[45:47 - 45:49] Speaker B: Yes, real. Real.

[45:49 - 45:53] Speaker A: Dia pun betul deh nak tolong. Nak nak save kita access mode. Betul eh? Ini semua.

[45:53 - 46:01] Speaker A: Berapa masa? Kalau boleh tidak ambil? Betul tak apa yang servis kita sudah ada kan? Injured tak? Cadangan satu. Cadangan saja.

[46:06 - 46:14] Speaker A: Yang expired, what happen kita expired? Hello. Saya boleh scan, betul kan? You know?

[46:14 - 46:19] Speaker A: Masalah sekarang. So just to be clear, right?

[46:19 - 46:23] Speaker A: The APP part, once they stream the data in when the passenger checks in.

[46:23 - 46:26] Speaker A: You all will inform the airline straight away. Bought or not bought?

[46:26 - 46:33] Speaker B: So, just take note. Usually we recommend for example the government usually. You cannot screen the entire database.

[46:33 - 46:35] Speaker B: It will be too long. You have to identify a subset of high risk individual.

[46:35 - 46:35] Speaker A: Yeah.

[46:35 - 46:38] Speaker B: So you screen and the whole transaction run through should not take more than 10 seconds. Usually is 5 seconds.

[46:42 - 46:43] Speaker B: Usually is a lot more.

[46:43 - 46:47] Speaker B: So you screen a subset of the incoming.

[46:47 - 46:52] Speaker B: Against the watch list or suspect list that we need high risk enough to board or not board.

[46:52 - 47:05] Speaker A: Say any any case like okay, from your side the passenger clear, all can both can board. Somehow when go through us nice detect that this one suppose maybe not bought. But you already pass.

[47:05 - 47:14] Speaker B: You'll wait for the. You see wait before you we need to set a time out. How long do you want to do? So there's a time out that we can set. So we send a request to ICE. ICE lah. Time out is 10 seconds we wait for the check. Dia bagi tah?

[47:15 - 47:20] Speaker A: So we have set every time before you update the airlines.

[47:20 - 47:32] Speaker A: Before like board, you still wait for nice to respond back. And if more than 10 seconds, then you right away update the airlines. Yeah. So these 10 seconds is configurable.

[47:32 - 47:35] Speaker B: You need to set a time out. You have to set what what the confidence.

[47:35 - 47:38] Speaker B: Firstly record from the ICE and from the data.

[47:38 - 47:43] Speaker A: How many seconds is the average? 5 seconds. 5 seconds. Any countries lah?

[47:43 - 47:44] Speaker B: Usually.

[47:44 - 47:47] Speaker B: Five to 10 lah. Usually they can always do long because the passenger is.

[48:03 - 48:05] Speaker B: The default is bought lah. default.

[48:05 - 48:10] Speaker A: No. If no response, document is okay. Oh document is okay to the airlines. They will check visa, they will check again, travel document.

[48:10 - 48:12] Speaker B: Okay they should line pass. because they perform.

[48:12 - 48:15] Speaker A: That support need to the document is okay. Regardless of they can just board.

[48:15 - 48:18] Speaker B: We already check the watch list or check again.

[48:18 - 48:31] Speaker C: Tapi kalau kita dapat yang APP itu orang sudah di dalam dan dia sudah dalam dan dia tengah isi kan. Proses sebab sepanjang masa dia check in, so ada dia punya proses.

[48:31 - 48:41] Speaker C: Kalau tak ada. Tak sempat. Apa yang sedang dia buat? So kalau dia kata tak dia kepada you. Dia dah berikan final decision.

[48:41 - 48:43] Speaker A: Ya, that's right.

[48:43 - 48:47] Speaker C: Ada dia punya decision. So dia macam.

[48:55 - 49:07] Speaker C: So bila orang check in. So dia akan pilih tiket ini and then check in. So bila mereka isi nama dia, check in dekat website ni. So dia akan nama dia. Then dia akan tengok.

[49:07 - 49:14] Speaker C: Dia akan hantar juga kepada. Then nice pula yang akan screening balik. Pasal dalam watch list.

[49:14 - 49:16] Speaker A: Ya. Boleh dah dimaklumkan.

[49:16 - 49:21] Speaker C: Tapi kalau ini tak sempat dengan pakaian.

[49:27 - 49:32] Speaker A: So then the proses still. But what I need to ask you is business for just really.

[49:32 - 49:33] Speaker A: It's just an internet.

[49:33 - 49:36] Speaker A: You still have your, you still have your group, right?

[49:36 - 49:39] Speaker C: kat sini dia patutnya tak boleh kot. Dia dah kot.

[49:39 - 49:44] Speaker B: For the purpose of sampai dekat KLIA nanti.

[49:44 - 49:50] Speaker C: Bila dia respond dia. Just currently without this kita pun dah sampai sini. Nanti dia akan jadi.

[49:50 - 49:53] Speaker B: Because what is is. So the one that we use.

[49:53 - 49:55] Speaker C: Dah banyak dah kita tahu kan?

[49:55 - 50:00] Speaker B: And you reduce the resources so many. Banyak dah kriteria.

[50:00 - 50:03] Speaker C: Ada banyak orang yang kita hantar.

[50:03 - 50:06] Speaker B: Dah reduce.

[50:06 - 50:09] Speaker C: Kena tak ada lah bahaya sangat.

[50:09 - 50:10] Speaker A: Boleh campur.

[50:10 - 50:12] Speaker C: Regardless of. Sebab sempat.

[50:12 - 50:16] Speaker C: Bila dia arrive dekat sini. Dekat sini pun dia akan run juga sebelum masuk.

[50:16 - 50:20] Speaker B: So so using those are in sorry. Using those dia akan real time juga.

[50:20 - 50:28] Speaker C: Tapi bila dia sampai sini bila dia nak run. Dia akan check. Basically orang yang memang dah genuine dah kan? Sepatutnya.

[50:28 - 50:33] Speaker A: Kalau kita check juga kepada Itu provide yang kita implement the bot no bot itu.

[50:33 - 50:34] Speaker B: boleh dapat.

[50:34 - 50:39] Speaker C: Ataupun think that it's think juga dahlah. Tapi kalau tak ada certain to different from the.

[50:39 - 50:42] Speaker A: Memang yang datang sini semua yang boleh. Ya?

[50:42 - 50:48] Speaker C: Ni bila kita. Tapi itulah maknanya. Ada. So itu dependent lah kita punya.

[50:48 - 50:57] Speaker B: Lepasnya dia dah actually send data you yang depan. So yang datang. Kalau tak boleh masuk pada dan suspect list. Itu sajalah. So that's why dia tak dapat score.

[50:58 - 51:02] Speaker A: Saya bagi dia dia. Ya, we whichever it is.

[51:02 - 51:03] Speaker A: Have you done some estimation?

[51:03 - 51:06] Speaker B: Yes, I do. Maybe uh your time.

[51:06 - 51:16] Speaker A: What is the number of coming from in countries or for whatever for Malaysia and you have. So you can start to formulate a forecast.

[51:16 - 51:33] Speaker B: size for like for CP London. And the story the request the real time. Dia bagi the day you put down yesterday what about that part? what is international everyday about per hour 6,000 per hour.

[51:33 - 51:34] Speaker A: That's the one speed.

[52:31 - 52:47] Speaker A: size for like for security agency that is the story, the request, the real time request. Yesterday we about how much. International our six thousand per hour

[52:47 - 52:49] Speaker A: Let's go one speaker speak.

[52:52 - 53:03] Speaker B: 6000 is a big number. 6000 is average, it's average.

[53:03 - 53:26] Speaker A: You look at the, from the current. The current have a problem because of our monitoring.

[53:26 - 53:46] Speaker A: So we are to be efficient on monitoring. We have problem like after two hours to set up like 20%. So you need acceleration before we fix.

[53:46 - 53:48] Speaker A: So.

[53:48 - 54:00] Speaker A: No, no, we know, we know about this issue. But seriously the different system is one of the So what.

[54:00 - 54:11] Speaker B: already about one 100 200. So the engineer error of the.

[54:12 - 54:12] Speaker B: Tuning.

[54:12 - 54:13] Speaker B: about.

[54:15 - 54:33] Speaker A: you know I resolution. Kalau kita cakap dia orang kena buat, tapi dia orang cakap. Kalau orang tu masuk melalui kayu hitam, Then dia orang kena buat. Then dia orang kita yang kena buat.

[54:33 - 54:44] Speaker A: Then kalau yang tu kita buat, bagi dia buat semua. So siapa yang akan buat entity resolution.

[54:44 - 55:01] Speaker A: Because I think it's not easy. Kau kena check ni ni ni ni ni. You use you. is going to take time. Fazi match takes time. Anything else

[55:01 - 55:13] Speaker C: sorry. Nick and any slides after this? these are the main process.

[55:14 - 55:21] Speaker C: face control document you can send that's all. Ya.

[55:21 - 55:25] Speaker A: the Json file containing the, the attributes at each stage.

[55:25 - 55:36] Speaker C: one for events, one for risk assessment requests, one for risk assessment response. Okay, this file.

[55:36 - 55:41] Speaker A: Do you also have a word document and say

[55:41 - 55:48] Speaker C: we still describe and then there's a sample. That document is a big big. so I be trying to compress and then.

[55:48 - 55:50] Speaker A: Ah, you, you what's necessary.

[55:50 - 55:54] Speaker A: Ah, we just need the key, which is.

[55:54 - 55:56] Speaker A: our concern is just.

[55:56 - 55:57] Speaker A: Thanks.

[55:59 - 56:03] Speaker A: Okay. So far, any questions?

[56:07 - 56:07] Speaker A: Okay, eh.

[56:09 - 56:12] Speaker A: Kena, kena fikirlah. (Malay word)

[56:15 - 56:21] Speaker A: So apa challenge dia? Apa challenge dia based on discussion tu? A yang.

[56:24 - 56:30] Speaker A: The main thing yang kita nampak is

[56:30 - 56:47] Speaker A: still those few things ah. Number one, kita kena, we have to see who will, we have to work togetherlah to do the entity resolution.

[56:47 - 56:50] Speaker B: Yang penting kita tengok security. Hmm. securitylah.

[56:50 - 56:53] Speaker B: Dia yang akan bagi ID, so kita tak buat.

[56:53 - 56:54] Speaker A: Faham. faham. Okey.

[56:54 - 57:00] Speaker A: A sorry, I take that back. I think it's better for us to have a look at the data yang dia orang boleh provide.

[57:00 - 57:06] Speaker A: Then we can do for the, apa ni, for the for the comment. We can, I mean anything after this we just communicate lah.

[57:06 - 57:09] Speaker A: If you all the mind we communicate directly with us.

[57:10 - 57:18] Speaker B: Because as part of the risk scoring, we also need the data for investigation purposes yang dalam eagle eye tu.

[57:18 - 57:20] Speaker A: Yang dari segi tu, I okeylah rasa itu tak ada. Tak ada.

[57:20 - 57:21] Speaker B: A itu tak ada.

[57:21 - 57:24] Speaker B: Sebab bila data tu nak masuk dalam.

[57:24 - 57:35] Speaker A: Let say tadi, a kita ada, kita ada 10 second untuk respon. kalau capable untuk tindak. Untuk let say in order.

[57:35 - 57:41] Speaker A: Because this is kita punya mata tengok volume tu. Let say nanti bila kita activate, adakah kita boleh respon

[57:41 - 57:44] Speaker B: Dia bergantung juga tuan, sebab

[57:44 - 57:51] Speaker B: kita we have to remember, some of the country might need a visa.

[57:51 - 57:57] Speaker B: So kalau dia apply visa, they already have the score. So if they send us the apa app data tu, if there's no changes.

[57:57 - 58:01] Speaker B: So pakai score yang lama pun sufficient dah.

[58:01 - 58:03] Speaker B: Ah, cuma kita kena tengok senario base nilah, senario mana.

[58:03 - 58:07] Speaker A: Because right a lot of risk scoring, they cannot be precomputer real time.

[58:07 - 58:10] Speaker A: Dia kena compute sebelum ni. Because otherwise the real time load is very very high.

[58:10 - 58:12] Speaker A: And it will be a separate service. Separate service.

[58:14 - 58:16] Speaker A: Dia tak akan ada dalam container yang sama.

[58:17 - 58:25] Speaker A: So yang untuk passenger traveler yang tak perlukan visa atau ataupun tak perlukan visa

[58:25 - 58:32] Speaker A: Sebab kalau yang perlukan visa kita dah ada pada. Dah ada biometrik semua so cepat.

[58:32 - 58:42] Speaker A: Ada fewlah kita nak tengok some of the senario yang nak tengok, apa, human trafficking during PNR tu.

[58:42 - 58:49] Speaker A: When you, when they are doing the booking yang free more than 8.30 you can. So this is yang itu yang kita dah tengok tapi the one you don't need the 10 second.

[58:49 - 58:53] Speaker B: Tak tak. Itu kalau macam saya cakap tadilah kalau from my experience.

[58:53 - 59:04] Speaker A: benar data yang kita banyak yang yang terbanyak saya guna untuk, pattern dengan trend pattern trend. Bila kita dah ada historical data tu.

[59:04 - 59:13] Speaker A: dan kita dah ada ski person yang kita nak investigat so baru kita pergi kepada each of this type of data punya travel agencies.

[59:13 - 59:21] Speaker A: travelling seat number and so on. Tapi biasanya kita tak guna untuk real time datang. Mungkin tak tu yang penting yang PNR tu yang penting not from your side.

[59:21 - 59:26] Speaker A: Our side juga akan sebab apa yang unik. Sebab dalam masa 72 hours tu we there is enough time to do some analysis.

[59:26 - 59:35] Speaker A: And then to generate the risk scoring lah. So by the time dia orang check in tu, dah tahu dah ini orang memang tak boleh buat ke apa ke. Kita tak perlukan the masa first itu maybe lepas atau lepaslah kan.

[59:35 - 59:47] Speaker A: Dia let say dia kat situ the 72 hours tu, eight ada possibilities kalau dia dia dalam MSL so maknanya memang dia don't know buatlah. Ada satu possibility dia akan board.

[59:47 - 59:56] Speaker A: Tapi dia ada risk. Ada risk mungkin related to any cases and so on. So this person yang being

[60:01 - 60:10] Speaker A: Kita perlu laju. maksud first kat situ maybe lepas atau lepas lah.

[60:10 - 60:16] Speaker A: Nanti kita dah buat cara kan? Haah. Dia let's say dia kat situ the security office tu.

[60:16 - 60:21] Speaker A: Update ada possibilities kalau dia, dia dalam SL, so maknanya memang dia boleh buatlah.

[60:23 - 60:28] Speaker A: Ada satu possibility dia akan board tapi dia ada risk, ada risk mungkin related to any cases and so on.

[60:31 - 60:37] Speaker A: So, this person yang kita dia arrive, this person yang kita akan refer this travelers to interview session.

[60:38 - 60:48] Speaker A: Kat sinilah baru kita ada, kita guna use case for IVC, interview and decide whether nak allow dia masuk ataupun nak ATL refusal to entry.

[60:52 - 61:01] Speaker A: Tapi basically, err those yang refer tu kita based pada scoring tu kita dah tahulah apa dia punya detail dia dan prediction.

[61:03 - 61:16] Speaker A: Sebab kalau macam contoh human trafficking err yang general punya. apa kata kalau kita bagi err dalam kalau let's say kita ada range of age, nationality, performing profiling.

[61:16 - 61:27] Speaker A: Kalau macam Philippine eh, female range between 20 to 40 traveling alone. tiket purchase late, hari ini, ini rule dia lah.

[61:27 - 61:29] Speaker A: Tapi dia ok for. Faham?

[61:29 - 61:32] Speaker A: It's just they maybe they are question bila dia sampai ataupun kena interview ah, so and so forth ah.

[61:38 - 61:41] Speaker B: so Tapi yang nak kasi tu you have passport number.

[61:41 - 61:44] Speaker B: Optional, passport number or high standard.

[61:44 - 61:48] Speaker A: A lot of use in the PR option. They already they already said we can check based on the names lah.

[61:49 - 61:50] Speaker A: And then mainly nationality.

[61:52 - 61:54] Speaker B: Banyak, ada info kan.

[61:54 - 61:57] Speaker B: mainly name. Actually, a lot of things inside higher option lah.

[61:57 - 62:00] Speaker A: provided that are. If not provided then airline will not enforce.

[62:03 - 62:11] Speaker B: Just in case like just in case in future we may, we may need to have a discussion to get the risk score from them also.

[62:11 - 62:13] Speaker B: Featuring to a risk scoring. Yeah.

[62:13 - 62:18] Speaker B: If you don't mind me asking the current risk scoring process you don't have to go into detail, but is it statistical in nature or is it human configured?

[62:18 - 62:19] Speaker A: Human configured.

[62:19 - 62:20] Speaker B: Human configured. Thanks.

[62:22 - 62:24] Speaker A: Only business new rule and rules. Based on the rules.

[62:26 - 62:31] Speaker A: Kita kena update juga err some Airlines which is Malaysia Airlines pula.

[62:31 - 62:35] Speaker A: Like EU airline, UK and so on. So, we don't have the PNR contact agreement.

[62:40 - 62:42] Speaker B: So, there's a data imbalance lah. Yeah, so maybe data imbalance.

[62:44 - 62:47] Speaker B: We need to represent this kind of uncertainty.

[62:51 - 62:53] Speaker B: Okey, okey. So, okeylah. I think if nothing much on my side. So,

[62:53 - 63:07] Speaker B: So, just just to summarize, so Sita site will provide us with the interface control document, selected portions of it, a word doc containing all the attributes that we will be provided at each stage. Okey, as well as three JSON files that are that will help us start some kind of design. OK.

[63:07 - 63:10] Speaker B: That's all for my side. Okey.

[63:13 - 63:18] Speaker B: And then, any further communication we'll try to reach out to you guys at any time. separately.

[63:18 - 63:21] Speaker A: If you want to look at the documents, after this you can.

[63:21 - 63:23] Speaker A: You can see what kind of.

[63:23 - 63:24] Speaker B: I know how is that.

[63:32 - 63:43] Speaker B: The rule configuration for a risk coin system is to be done by your gym site or or you all have your own risk configuration? Human government uses. So, what will be sama lah.

[63:43 - 63:49] Speaker A: Roles yang apply dekat APS, kami akan apply dekat web lah. Ada option. Standard lah kan?

[63:49 - 63:51] Speaker B: So, ada.

[63:51 - 63:54] Speaker A: Ada additional eh? Sen kuat.

[63:54 - 63:56] Speaker B: This our configurable lah.

[63:56 - 64:01] Speaker A: itu pun kita kena fikirlah. Adakah access process sama ke?

[64:01 - 64:07] Speaker A: Itu macam stroke dekat Ali dekat tapi dia communicable tadi yang di ABS.

[64:07 - 64:10] Speaker A: Lagi kena tackle juga macam mana dia?

[64:10 - 64:12] Speaker B: Macam mana dia dia macam ada

[64:12 - 64:18] Speaker A: nature dia? nature dia macam mana? euros lah? for for the first first priority check ada outboard or normal. That's right.

[64:18 - 64:25] Speaker A: And then, err within the apa the price of medicine maybe we need to do another err scoring to check detail err whether err ada blacklist customers or the entire database yang check ke tak?

[64:34 - 64:37] Speaker A: Sebab kalau nak check entire dekat sistem 5 seconds or 10 seconds I think.

[64:38 - 64:40] Speaker B: Ha ha. The driver will be screaming at the checking counter.

[64:40 - 64:42] Speaker A: One one never mind I miss out.

[64:42 - 64:46] Speaker B: One by one. Yes, yes. 10 seconds 20 30 40.

[64:46 - 64:50] Speaker A: Especially what you see long people like that.

[64:51 - 64:53] Speaker A: Taking one shell dia dah. Dia rasa straight forward. That is what we need.

[64:53 - 65:00] Speaker B: What one because profiling. There is a but all your workers are all class sendiri. Okey.

[65:01 - 65:03] Speaker A: Anyway.

[65:05 - 65:06] Speaker A: Masuk.

[65:07 - 65:07] Speaker A: Okey.

[65:07 - 65:08] Speaker A: Sugar.

[65:08 - 65:12] Speaker A: Please, the same pattern that you take of data from.

[65:12 - 65:13] Speaker B: Ha?

[65:15 - 65:17] Speaker A: I don't know the CP.

[65:17 - 65:18] Speaker A: Oh.

[65:18 - 65:21] Speaker B: Those yang ni.

[65:21 - 65:24] Speaker A: Nanti kita akan ada integration dengan Jabatan Laut dengan.

[65:24 - 65:24] Speaker B: Oh oh oh okey.

[65:25 - 65:25] Speaker B: Jabatan Laut.

[65:26 - 65:28] Speaker A: Sekarang tengok from the air, air.

[65:28 - 65:29] Speaker B: Air. Okey.

[65:29 - 65:32] Speaker A: So, kena buat dengan laut pula lah. session.

[65:32 - 65:34] Speaker A: We need to harmonize. Konsep lah? Konsep kita kena buat.

[65:34 - 65:35] Speaker B: Iya.

[65:35 - 65:37] Speaker A: Otherwise we have the separate.

[65:37 - 65:37] Speaker B: Jabatan Laut.

[65:39 - 65:42] Speaker B: Tapi kita Tuan dah ada discussion dengan Jabatan Laut?

[65:42 - 65:43] Speaker A: kita ada bisa.

[65:43 - 65:43] Speaker B: Ha?

[65:43 - 65:45] Speaker A: Sation juga lah.

[65:45 - 65:46] Speaker B: Oh. Si.

[65:46 - 65:48] Speaker A: kena tengok data dia dah. kena tengok data dia.

[65:48 - 65:49] Speaker B: IBC dah ambil kan?

[65:49 - 65:52] Speaker A: that somehow because we need to drop some.

[66:17 - 66:20] Speaker A: Ha guys you you take off data from

[66:20 - 66:21] Speaker B: Ha?

[67:33 - 67:35] Speaker A: Integration jugalah.

[67:35 - 67:37] Speaker B: Kena tengok data dialah.

[67:37 - 67:39] Speaker B: Kena tengok data dia.

[67:39 - 67:40] Speaker A: IVC dah ambil kan?

[68:18 - 68:22] Speaker B: Tak nak apa yang perlu.

[68:25 - 68:28] Speaker A: Assalamualaikum, maaf mengganggu.

[68:29 - 68:35] Speaker A: Ah minum pagi dah disediakan, cuma saya nak ganggu sikit.

[68:35 - 68:38] Speaker A: Saya akan edarkan kehadiran.

[68:38 - 68:44] Speaker A: Sila tulis nama di kumpulan masing-masing, contoh contractor nice, tulis dekat contractor nice.

[68:44 - 68:47] Speaker A: Kalau IVV tulis kat IVV, IPM tulis IPM.

[68:48 - 68:51] Speaker A: Kalau BTMR cari sampai belakang ada BTMR. Saya dapat kumpulan masing-masing. Boleh eh?

[68:51 - 68:57] Speaker A: Itu satu. Satu lagi, saya akan edarkan NDA. NDA ini adalah lampiran dua dengan lampiran tiga.

[68:57 - 69:04] Speaker A: Lampiran dua, tulis tarikh hari pertama join sesi bengkel. Lampiran tiga, tulis tarikh hari akhir sertai bengkel.

[69:04 - 69:08] Speaker A: Jika satu hari, tulis tarikh yang sama. Jika lopong-lopong-lopong, minggu depan dia sambung, tulis saja tarikh akhir sesi bengkel tu.

[69:08 - 69:09] Speaker A: Okey dapat ni?

[69:10 - 69:10] Speaker A: Boleh?

[69:10 - 69:12] Speaker A: Semua wajib isi.

[69:13 - 69:16] Speaker A: Jika dah selesai isi, boleh serahkan seorang pada Encik Hafiz.

[69:18 - 69:21] Speaker A: Dan kedatangan juga jangan lupa isi. Terima kasih.

[69:22 - 69:23] Speaker A: Jemput makan.

[70:08 - 70:14] Speaker B: Yeah, I mean right now we don't have to take. 10 seconds.

[70:14 - 70:30] Speaker B: But there is a serious is that so that we do our scrolling for subsequent station. And for instance, when the combination.

[70:57 - 71:00] Speaker B: Sebab apa kita punya sesi pendek?

[71:07 - 71:12] Speaker B: Where one day last where you plug some to the other.

[71:42 - 71:56] Speaker B: I don't know, should you be one to reach one already on some sort of something but the other way that is the one that you're standing right.

[73:04 - 73:08] Speaker B: the assessment is about what is publish here.

[73:48 - 73:51] Speaker B: of your for you.

[73:57 - 73:58] Speaker B: But it is.

[74:55 - 74:58] Speaker B: The message comes from the list from group.

[74:58 - 75:03] Speaker B: If the messages is from there then we consider it to the rest of the world.

[75:03 - 75:10] Speaker B: If they see the the the chance to let them the messaging that much longer.

[75:10 - 75:13] Speaker B: It's from them then you.

[75:13 - 75:19] Speaker B: You still keep on getting all these messages funny because it comes from.

[75:29 - 75:32] Speaker B: But we know that it is.

[76:11 - 76:14] Speaker B: Somebody needs to be in charge.

[75:00 - 75:14] Speaker A: hai. Ini di sisi. Jadi di sini lebih banyak. Ya oke. Jadi ini tidak terlalu bisa dipaksakan. Kalau ini. Ha ha. Kalau ini. Ya.

[75:14 - 75:15] Speaker B: Ya, masih.

[75:15 - 75:34] Speaker A: Dia sekarang. Dia buat ini dari. Kita buat dari sini supaya dia datang ke arah sini. Okey.

[75:34 - 75:43] Speaker B: Okey. Okey. Ah. Okey kalau ni kalau dia. Ya macam.

[75:43 - 75:48] Speaker A: Dia dekat dia. Ha itu kan.

[75:48 - 75:57] Speaker B: You nak tahu. dia punya.

[75:57 - 76:02] Speaker A: Jadi itu yang you sudah buat dalam. Okey.

[76:02 - 76:05] Speaker B: Ah dia nak letak dia dia punya.

[76:05 - 76:06] Speaker A: Ya, betul. Ya.

[76:06 - 76:11] Speaker B: Okey kena dia kena ada. Ha ni tempat dia.

[76:11 - 76:17] Speaker A: Ya. Ya ya. Kena kasi itu ke dia. Kena kasi dia tengok sini dulu.

[76:17 - 76:24] Speaker B: Ya. Jadi itu saja. Soalnya di sini kita kena.

[76:24 - 76:26] Speaker A: Ya. Okey.

[76:26 - 76:34] Speaker B: Dia dia akan kasi dia. Dia akan kasi dia.

[76:34 - 76:39] Speaker A: ini. Ini nak makan apa yang dia senang.

[76:39 - 76:47] Speaker B: Tak ada masalah. Ya dia dia dia kena sini. Tengok balik dia punya masalah. Tengok balik.

[76:47 - 76:51] Speaker A: Tulis. Tulis. Tapi tu dia sudah start buat ni. Okey.

[76:51 - 76:53] Speaker B: But make sure.
